

- ① Insert the adapter bracket into the quick-release base in the direction shown, and tighten the bracket tension screw.

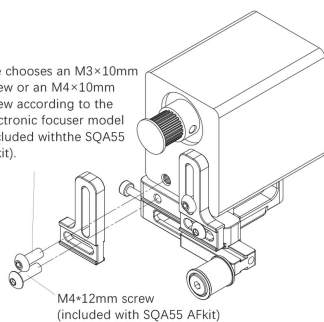

- ② Attach the synchronous pulley to the electronic focuser and lock it tightly.

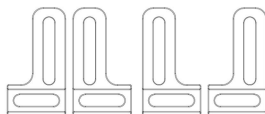

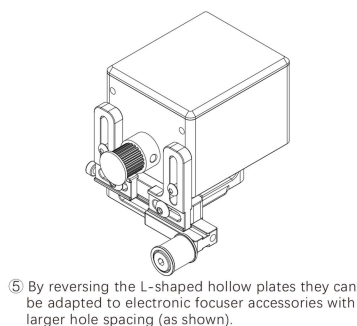

- ③ Place the electronic focuser on the base as shown in the picture.

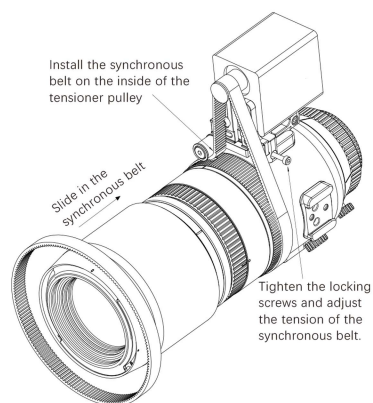

The chooses an M3×10mm screw or an M4×10mm screw according to the electronic focuser model (included with the SQA55 AFKit).

- ④ Lock the electronic focuser fixing screws and the L-shaped hollow plate fixing screws, respectively (on the right side of the figure, after assembly).

(The L-shaped adapter plate locks the electronic focuser and the electronic focuser bracket base with two pairs of screws. By changing the direction of the L-shaped adapter plate, it can be compatible with different screw hole spacing of different electronic focusers.)

- ⑥ Install the synchronous belt as shown
